

MEM Heatmap\*

Heatmap showing the expression of 40 genes across 15 cell lines. The color scale ranges from 195 (dark blue) to 1495 (red). The genes are listed on the y-axis, and the cell lines are listed on the x-axis. The expression levels are generally low (blue) for most genes across most cell lines, with some higher expression (red) observed for genes like CD147, CD56, and CD99 in certain cell lines.
